

Features of CleanMate 365:

- With the rolling brushes and the strong vacuum entry, it is suitable for use on any normal floors except plush and long fur carpet.
- Compact shape enables it to clean completely under beds, tables and other furniture which standard upright vacuums cannot do.
- Attached ultraviolet tube can generate ozone to provide disinfection.
- Attached remote control can be directly embedded into the upper cover and can easily command it to clean any part of the room.
- With photo sensors, it can detect the stairs to avoid falling down.
- It will stop automatically and keep making a sound to alert you when gets stuck.
- A five-step repetitive rotation movement can guarantee the most effective way to fully cover all of your room.
- To be more flexible, you can use separate mode to split the five-step movement from sequential to independent type.
- Can be freely set the length of the cleaning time from 10 to 80 minutes in 10-minute increments.
- It will come out from dark areas and stop at a brighter spot once finished cleaning or battery power is in low level.
- There is a built-in slot for you to put fragrance to remove odors.
